

## PTSG delivers Electrical Services at West Hampstead development

4 years ago

Premier Technical Services Group Ltd (PTSG) is providing specialist electrical services at a new residential-led mixed-use development in North-West London.

156 Westend Lane in West Hampstead comprises 164 new homes, including affordable rent, shared-ownership and private sale.

There will be over 18,500 square feet of employment space, including flexible subsidised space for local small businesses and start-ups, run by an independent workspace provider.

A community hub managed by a local group, new public green space, bio-diverse landscaping and improved 'Potteries Path' for safer walking and cycling.

This is a highly sustainable development with an on-site energy centre to reduce energy use and carbon emissions. The scheme is also car free except for Blue Badge parking.

Engineers from PTSG Electrical Services Ltd will install a bespoke lightning protection system at the new development. This will provide protection for the buildings and all users in the event of an electrical storm.

PTSG is the compliance and safety specialist, providing a full range of products and services to protect people, property and places for clients in all sectors.
