

PTSG makes major residential development fire-safe

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has completed part of a contract to deliver specialist fire solutions at Huntley Wharf in Reading.

Huntley Wharf is a new residential development under construction in Reading, which will comprise 715 apartments and duplexes in a riverside setting. It will feature a central riverside square with proposed café, restaurant, a local store, gym, nursery and landscaped open spaces along the river.

Engineers from [PTSG Fire Solutions Ltd](#) are installing sprinkler systems in a total of 15 residential blocks at the new development. They have just completed the phase hand-over of Blocks E1 and E2.

The Group's engineers are called upon to provide sprinkler systems in both commercial and domestic buildings, providing vital peace of mind for building managers and users alike.

To date, no one has ever died in a fire with a sprinkler system in the household. PTSG aims to keep it that way, adopting the latest technology to ensure our systems become ever more sophisticated and effective.
