

DMA supporting mental healthcare

3 years ago

Predicated on the success of a complex MEP project last year, DMA is delighted to have been reappointed directly by Springfield University Hospital in Tooting to deliver a comprehensive upgrade to their hot water services system.

SUH has been the primary location for mental health services in south west London for over 175 years. As well as being the Trust Headquarters, they provide inpatient and community services to the residents of five London boroughs, as well as some national specialist services.

A spokesperson for DMA Group said: "The overwhelming success of DMA's last project was reinforced with zero defects. DMA received fabulous customer feedback as a result and this stunning outcome continues to showcase our great people, routinely delivering great service, in order to achieve great results."
