

PTSG arrives at King's Cross development

4 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver a new lightning protection system at a major London's redevelopment scheme.

King's Cross is one of the largest regeneration projects in London. Work started back in 2007 and a lot has happened since then, but there's still a way to go.

Plot S4 is a significant part of the regeneration, delivering a combination of social and private residential flats with retail units situated on the ground floor. This includes the Waterlands fabrication centre of excellence, which gets underway this year.

Engineers from [PTSG Electrical Services Ltd](#) have been contracted to install a brand-new lightning protection system at the development. This will ensure protection of the building and all users in the event of an electrical storm

The Essex office of PTSG Electrical Services Ltd (trading as JW Gray) is thought to be the oldest trading provider of lightning protection services in the UK, possibly even Europe. It was established in 1835.
