

PTSG keeps flight training centre flying high

3 years ago

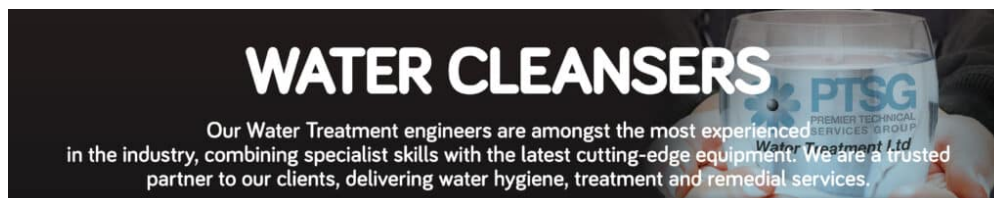

Premier Technical Services Group Ltd (PTSG) has been contracted to deliver specialist electrical services at a new flight simulator training facility – CAE London Gatwick, Crawley.

The state-of-the-art training facility is approximately three miles from Gatwick airport and is located on Manor Royal Business District. The training centre houses 18 full-flight simulator bays as well computer based training facilities, Airbus and Embraer FTDs and fully equipped classrooms for advanced pilot and cabin crew training. CAE London Gatwick also has dedicated training facilities for easyJet.

WATER CLEANSERS

Our Water Treatment engineers are amongst the most experienced in the industry, combining specialist skills with the latest cutting-edge equipment. We are a trusted partner to our clients, delivering water hygiene, treatment and remedial services.

Engineers from PTSG Electrical Services Ltd are carrying out a test and inspection of the lightning protection system in place at the facility. Such tests are mandatory and highlight any remedial work needed to keep a systems fully operation to protect both structures and users.

PTSG has delivered a variety of specialist services at UK airports and RAF bases throughout the UK. Earlier

this week the Group announced its Fire Solutions engineers had just completed a project at RAF Wyton, where they had designed, supplied, installed and commissioned six IG-541 (Inergen) fire suppression systems to protect the telecoms and server rooms.
