

## PTSG provides specialist care for Berkshire hospital

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist electrical services at King Edward VII Hospital.

The hospital, located in Windsor, Berkshire, is home to many services including:

- Audiology
- Diabetes medicines
- Dietetics
- Mobility
- Multiple Sclerosis
- Palliative Care
- Podiatry

King Edward VII Hospital also offers services provided by other hospitals, such as the Eye Clinic by Royal Berkshire Hospital, and Phlebotomy (blood testing) by Frimley Health.

Engineers from [PTSG Electrical Services Ltd](#) will deliver a test and inspection of the lightning protection system in place at the hospital. Lightning and surge protection systems are vital at all large buildings but are especially important at hospital and health facilities where a sudden power outage, resulting from an electrical storm, could be disastrous.

PTSG is the UK market leader in the provision off lightning protection services and provides protection for buildings and users in virtually every sector, with a great many hospitals included in its portfolio.
