

PTSG resolves fire security issues at Staffordshire Academy

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has completed a specialist fire and security solutions project at Staffordshire Academy.

Staffordshire University Academy, formerly known as Blake Valley Technology College (until 2003 called Blake High School) is a coeducational secondary school and sixth form located in Marston Road, Hednesford, Staffordshire, England. The school is sponsored by Staffordshire University and has recently moved into new buildings.

The Staffordshire Academy has had issues from the completion of the installation of fire and security equipment some months back – problems out of PTSG’s control. PTSG Fire Solutions Ltd and the supplier TDSI worked effectively together on site to resolve the issue involving an emergency card override, bringing praise for their approach.

[PTSG Fire Solutions Ltd](#) carries out a wide range of security systems installations including intruder alarms, CCTV, access control and door entry systems, for a fully integrated, state of the art approach to smart home security (smart home security methods apply equally to offices or commercial buildings).

Covering everything from the initial design and specification of security systems, through to the supply, installation, commission, training and long-term after-care, PTSG can provide technical and cost effective solutions to match clients’ expectations.
