

## Third successive Planet Mark and commitment to further carbon reduction in BM's latest CSER report

3 years ago

BM is delighted to have been awarded the [Planet Mark](#) accreditation for the third successive year, with a 26% absolute carbon reduction, it has also committed to a further 5% decrease, as announced in its latest [CSER](#) report, published this week.

As part of the accreditation, it reported on its pro-rated carbon reduction results for the period between 1 Jan 2020 – 31 Dec 2020, it has been especially commended on its waste, travel, procurement, water, social value, engagement and communication business impacts – supporting seven of the UN's sustainable development goals.

In the reporting period, BM achieved the 26% absolute carbon reduction from 2019-2020, meaning a decrease of 72.8 tCO<sub>2</sub>e total carbon footprint for its support office, which is 1.1 tCO<sub>2</sub>w total carbon footprint per employee.

### Ongoing Committement

As part of BM's ongoing activity, it has committed to a greater than 5% reduction across the company support function on its journey to Net Zero. BM is committing to work with The Planet Mark to measure its Social Value, the first contract caterer to do this.

The Social Value measurement has historically looked at social, environmental and economic activities such as people, community and volunteering, donations, procurement, and positive environmental impact.

## Working with The Planet Mark

BM works with the Planet Mark to help measure, engage and communicate its CSER commitments. It is the only contract caterer to have achieved the Planet Mark accreditation.

Further highlights in the company's CSER report include a focus on BM's 'Hidden Heroes' who have dedicated personal time and resource to support the communities they operate in, as well as a clear roadmap for further ED&I (Equality, Diversity and Inclusion) engagement across the business in the next 12 months.

[Ian Thomas, CEO](#), BM, said: "We remain as committed as ever to mitigate our impact to the planet by measuring and monitoring our impact which helps us to drive carbon savings going forward.

"Whilst the challenges of the last few years have been clear for all to see, we have maintained our focus on sustainability and do what we can to improve our social value as a business and individuals.

"We are exceptionally proud of the lengths our teams have gone to, not just in the reporting period, but before and after, and are delighted to be able to celebrate some of these within our latest CSER report."
