

A&R Services Secures Snowdonia National Park Cleaning Contract

3 years ago

After a competitive tender process, A&R Services has been awarded a major contract with Snowdonia National Park.

Having built a reputation for providing industry-leading soft services for major companies such as Welsh Water and One Central Square, it is the innovative approach to their work that made A&R Services the right choice for Snowdonia National Park.

Ashley Davies, Managing Director of A&R Services, said *"This is an extremely proud moment for us. Snowdonia is the largest national park in Wales and has over 10 million visitors per year, covering 823 square miles. We are glad that our amazing team get to deliver the very best service to them across 17 locations"*

A&R Services are currently in pre-launch of an app that puts their clients in control, allowing them to see real-time information about upcoming and previous jobs, audits and more.

Chloe Stanford, Executive Director of A&R Services, said *"We are always looking for new ways to make things simpler for our clients and improve our services. Our new app saves our clients valuable time and gives them all the information they need in their pockets."*

Dora Vasarhelyi, Operations Director of A&R Services, added *"We are extremely happy to be working with Snowdonia National Park. Thanks to our investment in new technology and the quality of our staff, we are able to stay ahead of the curve, bring in exciting new clients such as Snowdonia and continue our expansion across the UK."*

This new contract is one of many recent tender wins for A&R Services who continue their growth following a successful MBO, putting them on track for another record-breaking year.
