

Space Solutions strengthens Facilities Management team with appointment of Tracey Bell

3 years ago

Workplace design and management consultancy, Space Solutions, has appointed Tracey Bell as Senior Facilities Manager, to boost its expert FM division.

Tracey's appointment expands the Facilities Management team to over 30 and builds on skills in supporting client operations from procurement and contract management to service delivery, performance monitoring and strategic reviews.

Tracey has a proven track record in delivering Facilities and Property Management services across both public and private sectors and has a background in architecture and engineering. Her former roles include Head of Estates & Facilities at Mental Health Concern Insight; National Account Manager, North for Salisbury Group; and Estates & Property Manager for TEP Ltd. Tracey joins an expert team which includes contract management and logistics specialist, Miguel Montenegro and which is headed by Director of Facilities Management, Stuart Craig.

Stuart Craig commented: "Our FM team is highly regarded and brings considerable expertise in contract management, procurement and operational performance that can transform our client's business.

"The team works with clients across the public and private sector, and we are proud to have added NEC4 TSC accreditation to our skillset through Miguel Montenegro. This allows us to work across NEC contracts on procurement, negotiations, implementation and contract management."

Tracey Bell said: "I'm so thrilled to have joined Space Solutions to work alongside such experienced and

skilled individuals. I'm really looking forward to sharing my enthusiasm and passion with everyone in FM, using my wealth of knowledge and skills to set the standard, grow sustainably and extend our range of services."

The Space FM Consultancy Service offers specialist support, using bespoke software packages, with the procurement and adoption processes of NEC contracts and includes fully trained and qualified practitioners in the implementation and use of NEC3 & 4 Contracts (TSC, TSSC, and FM).
