

[PTSG to shore up major North London redevelopment](#)

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been awarded a contract to provide specialist electrical services at a re-envisioned Brent Cross Town.

Brent Cross Town is undergoing a £5m redevelopment – one of the most anticipated in North London. The new town centre will be set around 50 acres of green parks and playing fields, with plans to offer 6,700 new homes and workplaces for 25,000 Londoners. It will also offer three redeveloped schools, health, wellness and amenity services. Brent Cross Town pledges to be Net Zero Carbon by 2030.

Engineers from [PTSG Electrical Services Ltd](#) will install a brand-new lightning protection system at the redeveloped town centre, providing protection for both buildings and users alike in the event of an electrical storm.

Lightning protection systems are vital in all buildings over a certain height – the risk of being struck can be calculated by taking into account the type and height of the structure and the number of lightning strikes per year for the region. PTSG is the UK's leading provider of lightning protection services. This includes bespoke and standard system installation, test and inspection and maintenance. It also encompasses surge protection and specialist earthing systems.
