

SLC Property awarded a place on ESPO Framework

May 18, 2022

SLC Property, the experienced property and land experts, has been awarded a place on the ESPO framework Estates Management Professional Services (2700).

The company was successful in specialised lots including General Valuation; Compulsory Purchase and Compensation; and Planning Consultancy.

ESPO is a public sector owned professional buying organisation which offers a catalogue of over 25,000 products, as well as over 100 frameworks and bespoke procurement services.

Suppliers listed on the framework have been rigorously assessed in line with UK/EU procurement legislation, for financial stability, track record, experience, social value contribution, and technical and professional ability.

Russell Mills, Head of Acquisition and Development at SLC Property said: "SLC Property's team of RTPI and RICS professionals have extensive experience in providing property consultancy services across a broad range of sectors including renewable energy, highways, and rail.

"Being awarded a position on this ESPO framework will make it quicker and easier for new clients to be able to procure our services and it also illustrates the high standards we maintain and the track record we've already established."
