

Tilbury Douglas has collaborated with Unity to help drive digital innovation within the construction industry

3 years ago

Tilbury Douglas has announced a new collaboration with Unity to help drive digital innovation with the construction industry.

[Unity](#) (NYSE: U), is the world's leading platform for creating and operating real-time 3D (RT3D) content.

Mark Buckle, Technical Director at Tilbury Douglas, commented: "Collaborating with a pioneering, digital expert like Unity will enable us to help lead the way in digital construction innovations! Our vision is for everyone from the very tech savvy project manager to the less tech focussed to be able to access project information in a quick and easy to use, and easy to understand, way."

"We're honoured to be collaborating with Tilbury Douglas, Unity's real-time 3D platform transforms every stage of the construction lifecycle, helping professionals unlock building information modelling (BIM) data through immersive real-time experiences," said Dave Rhodes, Senior Vice President Digital Twins at Unity. "Real-time digital twins will permanently change how we live and work, make a positive impact on our planet, whilst representing a significant component of what is often referred to as the 'metaverse'."
