

# SPIE awarded nine-month contract with Bruntwood SciTech for the renovation of laboratories at Alderley Park

4 years ago

SPIE UK, a subsidiary of SPIE, the independent European leader in multi-technical services in the areas of energy and communications, has been appointed by Bruntwood SciTech to deliver design and refurbishment services at Alderley Park – the UK's largest single site life sciences campus.

Under the contract, SPIE will be carrying out a wide range of works on Block No. 50, including the design and refurbishment of the basement plant room, the first and second floors, and the level 3 roof area. The team will provide general and specialized mechanical, engineering, and plumbing (MEP) services to the laboratory space as well as category A and B works.

Category A will focus on the condition of the existing primary MEP services, while category B involves the complete fit-out and modifications required to adjust the existing layout to the customer's bespoke requirements.

Steven Farmer, Divisional Managing Director at SPIE UK said, *“Having built a strong relationship with Bruntwood SciTech over several successful schemes at Alderley Park, we’re excited to showcase our expertise once again by using our collective MEP skills, applying best design practice and full compliance with the relevant codes of practice and legislation to deliver a functional and efficient infrastructure.”*

Chris Ripper, Project Manager at Bruntwood SciTech, a partnership between property company Bruntwood and Legal & General, said, *“As part of a highly validated industry facing rigorous regulatory requirements, we’re delighted to work once more with SPIE UK and feel confident that they will deliver an exceptional*

*service on time."*
