

Tilbury Douglas named main contractor for Network Rail Houston Street Project

4 years ago

This month Tilbury Douglas, a leading UK building, infrastructure, engineering and fit-out company, began work on the refurbishment of Network Rail's Houston Street offices in Glasgow.

The industrial warehouse with ancillary office accommodation is spread across two floors. The project will include the strip out of existing office facilities to allow refurbishment. In addition, new accommodation blocks will be formed within the existing warehouse floor to house sanitary facilities, charge stores and workshops.

Speaking about the project, Cameron Stewart, Scottish Regional Director at Tilbury Douglas, said: "We are delighted to be working with Network Rail on this exciting project. Our team has extensive experience in office and warehouse refurbishment, and we see the current growth in this sector as an excellent opportunity for us in Scotland.

"We have now started on site and are looking forward to delivering a top-class facility for Network Rail."
