

BAM's Facilities Management business secures place on major Government services framework

3 years ago

BAM FM has secured a place on a major services framework.

BAM has been named as a Crown Commercial Service's (CCS) Total Facilities Management, Hard FM and Soft FM supplier for the Facilities Management and Workplace Services framework RM6232.

CCS supports the public sector to achieve maximum commercial value when procuring common goods and services.

BAM FM secured places on six Lots, including:

- Lot 1a Total FM with a value band of 0 - £1.5m based on Annual Contract Value
- Lot 1b Total FM with a value band of over £1.5m - £10m based on Annual Contract Value
- Lot 2a Hard FM with a value band of 0 - £1.5m based on Annual Contract Value
- Lot 2b Hard FM with a value band of over £1.5m - £10m based on Annual Contract Value
- Lot 3a Soft FM with a value band of 0 - £1m based on Annual Contract Value
- Lot 3b Soft FM with a value band of over £1m - £7m based on Annual Contract Value.

The framework will be available to central government departments and all other UK public sector bodies, including local authorities, health, police, fire and rescue, education and devolved administrations. It is intended that it will be the recommended vehicle for all facilities management required by UK Central Government Departments.

CCS supports the public sector in achieving maximum commercial value when procuring common goods and services. In 2020/21, CCS helped the public sector to achieve commercial benefits equal to £2.04bn – supporting world-class public services that offer best value for taxpayers.

The framework is valued at up to £35bn and will run for four years and covers services such as workplace FM services, M&E maintenance, building fabric, cleaning and security.

“This is a very important framework for BAM FM to be part of and will serve to build on our existing government and public sector portfolio of delivering FM services to local authorities, schools, universities, MoD, the NHS Trust and Blue Light services.

Louise Williamson, BAM FM Managing Director, said: “We are excited to bring our FM expertise to new public sector clients underpinned by our range of digital tools to drive transformation and enable intelligent, data-driven maintenance decisions based on actionable intelligent analytics.

“Our holistic understanding of the whole life of assets and estate management is empowered by our integrated model that combines FM services, design, construction, engineering, and energy management.

“As an FM leader in Scope 3 reporting, we are in a strong position to guide our clients through their carbon-free journey to achieve net-zero and sustainability targets and achieving outstanding social value.
