

GIND UK proves endoscopes are not only for doctors

3 years ago

The maintenance team at [GIND UK](#) are using an endoscope to carry out inspections of the internal jib wires and mechanism as part of the BMU testing and commissioning works at 185 Park Street, London.

185 Park Street is a brand-new mixed-use development providing workspace in a ten-storey building, and two residential blocks – fifteen and nineteen storeys respectively – along with amenity at ground and lower ground, and retail and café spaces. ‘Triptych Bankside’ was designed by acclaimed London architects Squire & Partners.

Integral Cradles, the design and installation partner of GIND UK, previously completed the successful and safe installation of a façade access solution comprising multiple BMUs at the development.
