

GIND UK starts work at 185 Park Street

3 years ago

Following the successful and safe installation of a façade access solution comprising multiple BMUs at 185 Park Street, London by Integral Cradles, GIND UK starts the testing and commissioning process to get this technically challenging access equipment into warranted use.

185 Park Street is a brand-new mixed-use development providing workspace in a ten-storey building, and two residential blocks – fifteen and nineteen storeys respectively – along with amenity at ground and lower ground, and retail and café spaces. ‘Triptych Bankside’ was designed by acclaimed London architects Squire & Partners.

Integral Cradles is the design and installation partner of GIND UK. The two work together to deliver a whole lifecycle solution for their clients.
