

Grundon drivers swap refuse vehicles for virtual reality headsets

3 years ago

Grundon drivers, as part of their Safe Urban Driving training course, have swapped refuse vehicles for virtual reality headsets.

In a continuing bid to keep our roads safe, this technology allows Grundon's drivers to experience sharing the roads with HGV vehicles from a cyclist and pedestrian perspective.

Grundon is the UK's largest family-owned supplier of integrated waste management and environmental services. Founded in 1929, the company has developed a distinctive approach that has helped it to maintain a leading position within the waste industry. This approach is underpinned by a commitment to quality of service, innovation and technical progress, together with a genuine and demonstrable concern for the environment.
