

INTEGRAL CRADLES ACHIEVES JOINT CERTIFICATION FROM LRQA OF THREE STANDARDS

3 years ago

Integral Cradles is delighted to announce that its team has achieved triple certification of its management systems: ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 from for the installation and warranted maintenance of facade access systems in the UK and Ireland. The certificate was issued by Lloyds Register of Quality Assurance (LRQA), a body accredited by the United Kingdom Accreditation Services (UKAS).

LRQA is a leading global assurance provider. It offers independent auditing, certification and training, to technical advisory services, to real-time assurance technology and data-driven supply chain transformation.

LRQA was the first certification body to gain accreditation from the United Kingdom Accreditation Service (UKAS), which is the Auditors Auditor demonstrating they have the experience, expertise and professionalism to ensure our systems are fully compliant with the ISO standards. Furthermore, their extensive experience has assisted us improve the systems further throughout the audit process.

Integral Cradles' triple certification is a visible sign of its team's commitment to being a premium service provider with compliance at the forefront of the company's approach.

Integral Cradles would like to thank consulting partner Statius Management Services Ltd for its help with the implementation of the updated systems to ensure a successful audit by LRQA.
