

Integral Cradles completes Phase 1 of installation at Triptych Bankside

3 years ago

Integral Cradles has completed the first phase of the installation of access equipment at 185 Park Street (Triptych Bankside), London.

The team from Integral Cradles has been working alongside the client team at Sons and Co, on architects Squire & Partners' mixed-use development.

185 Park Street is a three-building development – hence the name. It boasts workspace in a ten-storey building, and two residential blocks – fifteen and nineteen storeys respectively – along with amenities at ground and lower ground, plus retail and café spaces.

Integral Cradles is the design and installation partner of GIND UK, which has started the testing and commissioning process to get this technically challenging access equipment into warranted use. Together, the two deliver a whole lifecycle solution for their clients.
