

Inviron maintains its place on new CCS Framework

4 years ago

[Inviron](#) is one of the suppliers on Crown Commercial Service's Facilities Management and Workplace Services Framework, RM6232, for the supply of hard facilities management services. This framework will provide facilities management for a range of public sector bodies, including schools, hospitals and Government departments, helping further develop Inviron's Public Sector business over the next four years.

Inviron will be undertaking two lots offered by the framework:

- Hard Facilities Management Lot 2a
- Hard Facilities Management Lot 2b

Crown Commercial Service supports the public sector to achieve maximum commercial value when procuring common goods and services. In 2020/21, CCS helped the public sector to achieve commercial benefits equal to £2.04bn - supporting world-class public services that offer the best value for taxpayers

Social value will form a significant part of the contract delivered through the framework, and this reflects Inviron's own commitment to ensuring diversity and inclusion, creating opportunities for apprentices, training and employment and embedding social enterprises within its supply chain.

Inviron is a UK and Ireland based technical facilities services provider working across both Public and Private Sectors, who have built long term trusted partnerships with their clients. They provide data-driven service and asset solutions and energy management.

Inviron Managing Director, Noel Clancy commented *“We are delighted to have been awarded a place on the CCS framework. This channel gives Inviron the opportunity to demonstrate our strong technical and digital capabilities which are helping our other clients achieve their net zero ambitions. We look forward to doing likewise here through collaboration and partnerships.”*
