

ISS and Danske Bank extend partnership

3 years ago

ISS A/S, a leading workplace experience and facility management company, today announced that it has extended its partnership with Danske Bank and will continue to provide integrated facility services to the Nordic bank for another five years.

ISS has delivered services to Danske Bank for many years and became integrated facility service partner for the bank in 2015. With the new extension, ISS will continue to be the main service provider on a number of services, including facilities management, cleaning, technical, food and support services.

"We are delighted to have renewed our integrated facility services agreement in partnership with Danske Bank. We are excited to work together to further Danske Bank's ambitions within employee engagement, workplace experiences, sustainability and inclusion. The extended partnership is a testament to all the great efforts that are delivered by almost 650 ISS placemakers every day," says Andrew Price, Head of Strategic Growth at ISS.

ISS will deliver its services to Danske Bank across five countries – Denmark, Norway, Sweden, Finland and Lithuania. The extended partnership will go live from 1 July.
