

Mitie appointed as a supplier to new Government facilities management and workplace services framework

3 years ago

Mitie has been named as a supplier on the new Crown Commercial Services (CCS) framework, RM6232.

The appointment enables Mitie to tender for contracts across all Government departments and public sector organisations to deliver a full range of facilities management services, from waste management and landscaping, to building maintenance, cleaning, reception and security services. The contact is intended to run for four years.

Only appointed suppliers are able to bid for work under RM6232 for contracts with a combined total of up to £36bn in value. This cements Mitie's position as a key supplier to Government, enabling it to offer its significant expertise and experience in providing facilities management services across the public sector.

The Crown Commercial Service supports the public sector to achieve maximum commercial value when procuring common goods and services. In 2020/21, CCS helped the public sector to achieve commercial benefits equal to £2.04bn – supporting world-class public services that offer best value for taxpayers.

Mitie is already a supplier on other CCS agreements, including the Vehicle Charging Infrastructure Solutions (VCIS), the Heat Networks and Electricity Generation Assets (HELGA), and the Building Cleaning Services contracts.

Brian Talbot, Managing Director, Central Government & Defence, Mitie, said: "We are proud to continue our support for the UK's public sector through our appointment to this framework. As one of the government's strategic suppliers providing facilities management services, we are excited to bring our

innovation-led approach to deliver efficient, safe and sustainable spaces for government.”
