

Pareto FM lands place on £5.8 billion NHS framework

3 years ago

Leading facilities services provider, Pareto Facilities Management, has been awarded a place on the NHS Total Facilities Management 2022 Framework.

Pareto FM was one of only 18 service providers that successfully made it on the framework which runs until July 2026. This achievement again puts Pareto amongst the leading providers within the facilities sector.

[Ian Wiggans, Pareto, Business Development Director](#) commented: “Following the success of winning a place on the Crown Commercial Services framework we are delighted to be awarded a place on this new NHS framework. Again, this was a well detailed, rigorous and robust process which challenged all areas of the business to ensure we’d be fit for purpose.

I am delighted we passed the test and look forward to working with one of the most important health sectors in the world. We are absolutely thrilled with this result and once again are delighted to lead the way for SMEs within the facilities sector, showing the art of the possible.
