

SPACE FM awarded position on new Government Facilities Management and workplace services framework

3 years ago

Space Solutions have been named as a supplier on Crown Commercial Service's Total Facilities Management framework.

Crown Commercial Service (CCS) supports the public sector to achieve maximum commercial value when procuring common goods and services. In 2020/21, CCS helped the public sector to achieve commercial benefits equal to 2021/22 & £2.8 billion supporting world-class public services that offer best value for taxpayers.

Through the framework, all public sector organisations in the UK can access a range of Facilities Management (FM) services from cleaning and waste services to maintenance services and landscaping. This is an incredible achievement for the SPACE FM team, as they look to expand their reach and utilise the talents of their growing team in the coming years.

Stuart Craig, Director Facilities Management, said: "We're delighted to be awarded the CCS framework for a second 4-year period. It's a reflection and recognition to the team's quality of service and delivery and we're looking forward to supporting public sector projects across Scotland and the UK."
