

DMA retain Institution of Civil Engineers

3 years ago

DMA Maintenance is delighted to have retained ICE's iconic Westminster estate for another three years.

A spokesperson said: "It's so rewarding to have earned the loyalty and trust of such a cherished and progressive customer. Our scope continues to be the planned and 24/7 reactive maintenance, repairs, small works and larger refurbishment projects too.

"Our unique service management platform BiO® has automated all of our business processes to provide transparent performance and status reporting via real-time, automated dashboards that also deliver targeted 'calls to action' for our customers. That data is available to everyone, anywhere, anytime, on any device at no extra cost.

"Powered by our expertise and our technology we're making buildings work better and changing the UK maintenance industry, for good."
