

## PTSG takes studious approach at Strathclyde University

3 years ago

Premier Technical Services Group Ltd (PTSG) has secured a contract to provide a variety of water treatment services at Strathclyde University.

Founded in 1796, the University of Strathclyde is a public research university located in Glasgow. It is the city's second-oldest university (the oldest being the University of Glasgow), having received its royal charter in 1964 as the first technological university in the UK.

23,000 students from 100 countries are enrolled on undergraduate and postgraduate courses at the University of Strathclyde. It was the first university to be named University of the Year twice: in 2012 and again in 2019. It occupies an impressive 15th place in the best UK universities league table published by The Guardian.

HCS is a premium provider of Legionella control and management of water systems; its team will be delivering a variety of water treatment services in this contract.

Last year, Engineers from PTSG Access & Safety Ltd tested mansafe systems, eyebolts, abseil anchors and ladder ties across 11 buildings on the campus. This was done by a team of two engineers, who visit the site for two weeks a year for a minimum of three years.
