

Volta Compliance shortlisted in first ever Connect Yorkshire Business Awards

3 years ago

Richard Carr, Managing Director of [Volta Compliance](#), has every reason to smile – his organisation is to be recognised for its hard work and dedication in both the local and national business community.

The inaugural Connect Yorkshire Business Awards will take place on 30th November 2022 at the Royal Armouries Hall in Leeds. Volta Compliance is shortlisted in two categories: 'Small Business of the Year' and 'Outstanding Achievement'.

This is not the first time this year that Leeds-based company has been the subject of prestigious praise. In June, Richard and his team learned they had been listed on the Digital Enterprise Top 100.

Digital Enterprise is an innovative new business support programme which helps eligible, growth-focused businesses based in the Leeds City Region to scale up and achieve digital transformation. Volta Compliance is one of the small and medium-sized companies from across nine Leeds City Region local authority areas that feature in the TOP 100, which can be [viewed online](#).

Volta Compliance keeps companies compliant in all aspects of their premises' electrical installations. This includes planned inspections, on-going testing and safety checks. The result is to ensure businesses operate in accordance with the latest regulations and their work team and visitors stay safe.

Richard Carr said: "I am delighted that Volta Compliance has been shortlisted in the first ever Connect Yorkshire Awards. We're a proud Yorkshire company, but our reach extends nationwide and over the last twenty years we have become the trusted name for managing the complete electrical contractor services in full for businesses UK-wide.

“Our role is to ensure our customers enjoy a smooth-running supply of power by making sure that their electrical network is robust and efficient. We have made a significant investment in digital technology, including our own online portal for our customers. We – and our customers – are now reaping the benefits of our investment.”
