

Jaguar completes London's first ever NABERS rating

3 years ago

[Jaguar](#) is delighted to have provided London's first ever NABERS UK Energy rating.

The assessment was conducted by Adam Nguyen, one of our two NABERS UK Licensed Assessors, for an existing client on a property in the city.

Launched in November 2020 and administered by BRE, The NABERS UK Energy for Offices Scheme enables building owners to rate, verify and disclose the energy 'performance in-use' of existing offices, based on actual metered consumption. NABERS UK creates much needed market transparency and an investment grade rating that can be used to drive improvements in energy efficiency.

Steve Jackaman, Operations Director said: "We're very proud to be the first business to complete a NABERS UK Energy for Offices assessment to a London property. Congratulations to Adam on this significant achievement, let's hope it's the first of many!"

Ruby Smith, Partnerships Account Manager, BRE, commented: "We congratulate Adam on passing his supervision and completing his first NABERS UK Rating. As the first project to receive a rating in London, we appreciate the challenges of working on a new rating scheme in the market which Adam handled with ease, and recognise this as a landmark project for both Jaguar Building Services and their client."

Adam Nguyen, Energy Manager commented: "The built environment is a significant contributor to climate change, and I believe NABERS ratings can provide a foundation for a robust sustainability strategy. I look forward to carrying out further ratings in the future and helping our customers work towards achieving their carbon net zero targets."
