

PTSG to protect new Bermondsey development

3 years ago

[Premier Technical Services Group \(PTSG\)](#) has been awarded a contract to deliver specialist fire solutions at a new neighbourhood in the heart of Bermondsey.

London Square is the developer that has created 406 new homes, 35 per cent of which are described as affordable, within the second phase of a £220million London regeneration project. The mixed-use development in Grange Road, Bermondsey, also includes art studios and gallery space in landscaped gardens and walkways, opening up the site for the first time.

London Square Bermondsey scooped a prestigious Silver Award in the Best Apartment Scheme category at 2021 WhatHouse? Awards. The judges' comments highlighted the pivotal role the development is playing in the wider regeneration of the SE1 area.

Engineers from [PTSG Fire Solutions Ltd](#) are installing a commercial sprinkler system at the new development. There have, of course, been huge developments in fire safety within large residential buildings over the last five years. Sprinkler systems remain the most effective means of life and property protection available.
