

PTSG to work at the nation's science centre

3 years ago

[Premier Technical Services Group \(PTSG\)](#) is to deliver specialist electrical services at Culham Science Centre in Abingdon, Oxfordshire.

Culham Science Centre combines world-class publicly funded research into fusion power; commercial technology organisations and Culham Innovation Centre, to create a powerhouse of high technology innovation and enterprise in South Oxfordshire.

Culham Science Centre, owned and managed by the United Kingdom Atomic Energy Authority, is sited in one of the most successful science locations in the country and is a partner in Science Vale UK, along with other public and private sector organisations in the area, to promote southern Oxfordshire as a global hot spot for enterprise and innovation in science, high technology and the application of knowledge.

Engineers from [PTSG Electrical Services Ltd](#) will install a brand-new lightning protection at Culham Science Centre, which is built upon the site of the old Royal Naval Air Station HMS Hornbill which had been commissioned in 1944. The airfield was operational as part of the Fleet Air Arm between 1944 and 1953.

PTSG Electrical Services Ltd is the UK's leading supplier of lightning and surge protection services. Its engineers deliver systems and equipment, as well as test and inspection, upgrades and maintenance, for clients in all industry sectors.
