

## [Deloitte named a Leader in Worldwide Industry Cloud Professional Services by the IDC MarketScape](#)

4 years ago

[Deloitte](#) has recently been positioned in the Leaders Category of the [IDC MarketScape: Worldwide Industry Cloud Professional Services 2022 Vendor Assessment](#) (doc #US48187622, September 2022). The [previous version of this report was published in 2019](#) and also named Deloitte as a Leader.

The IDC MarketScape is “an assessment of the market for industry cloud professional services and how some of the major professional services firms are engaged in the space.”

“Deloitte has been at the forefront of evolving our industry cloud solutions – based on principles of sustaining innovation by building with modularity, micro services architecture and modern engineering principles to create an enduring competitive advantage for our clients,” said [Ranjit Bawa](#), US Cloud Leader, Deloitte Consulting LLP. “Our goal is to constantly evolve and leverage our industry clouds to rapidly bring industry domain experience and ambitions into reality by engineering tailored solutions for our clients.”

According to the report:

- “Deloitte has extensive experience in building industry clouds and deep domain expertise in industries and verticals, as well as the technologies that the company serves.”
- “[Deloitte] has a mature and deliberate approach to working with partners and ecosystems, a loyal client base, and a rich library of composable, innovative assets. It is focused on continuously developing its people, engineering resources, and M&A activities in support of its industry clouds practice.”

- “Consider Deloitte when you want a proven and creative partner that can codevelop and build industry clouds fast for complex and transformative use cases. Deloitte’s expertise in niche markets across industries and the company’s deep experience with AWS, GCP, Oracle, SAP, and Salesforce technologies make the firm a good partner for co-innovation projects.”

“Industry clouds help enable differentiation and innovation and provide organizations with the ability to transform and disrupt their markets,” said [Sam Balaji](#), Deloitte Global Consulting Leader. “Through industry-leading solutions, deep technical knowledge and strong modern software engineering capabilities, Deloitte looks forward to continuing to deliver value for our clients.”

With [Deloitte’s industry cloud solutions](#), organizations can better accelerate their business transformation (by leveraging the power of cloud and other technologies such as AI, machine learning, blockchain, IoT, 5G, AR/VR, and more), to address issues at the heart of their industry.
