

Q3 launches Simply Cleared

3 years ago

Q3 Services, already well established as a commercial waste management service provider, has expanded its scope by launching Simply Cleared, a new business providing waste clearance services to the general public.

The launch of Simply Cleared will address the growing issues faced by many households when trying to dispose of waste items that cannot be processed through the normal refuse and recycling collection services.

Through the Simply Cleared website, it is possible to obtain a quick online quote for the removal of virtually any household and garden waste and arrange a fast, efficient arrangement for its collection.

Customers can be confident that as a registered waste carrier, Simply Cleared will be disposing of their waste responsibly and not adding to the growing problem of fly-tipping that is creating eyesores and environmental damage across the country.

The company will be operating a sustainable business model, advocating a reduce-reuse-recycle approach to ensure the minimum amount of waste ends up in landfill. Q3's experienced, commercial supply chain network will be supporting Simply Cleared to achieve this objective.

Commenting on the launch of Simply Cleared, Amy Merrell, Account Manager, Waste Services, said: "Managing domestic waste has reached crisis point in many parts of the country and we believe Simply Cleared will take the pain away from residential customers. It's waste removal made simple, removing the hassle with one easy call or email to solve the problem!"
