

Reconomy partner with edie to produce SDGs blueprint

October 3, 2022

With less than 10 years to meet the UN's Sustainable Development Goals (SDGs), how can the gap be closed between ambition and action?

Since the UN's SDGs were created in 2015, companies around the world have pledged to support the goals in their operations, to advance global progress towards achieving all 17 SDGs by 2030.

In partnership with edie, **Reconomy** has produced a report to examine the SDGs and show progress towards achieving them in closer detail, outlining the action gaps for each and how businesses can help deliver them.

Providing a snapshot of progress against all 17 goals, this report aims to provide a blueprint for business leadership, showcasing case studies and opinion pieces from industry expert insight.
