

Reliance High-Tech appointed to the new CCS framework (RM6257)

3 years ago

Reliance High-Tech, a market leading security integrator, has worked as an appointed framework partner with [Crown Commercial Services \(CCS\)](#) for a number of years, and is proud to announce its appointment to the new [CCS framework \(RM6257\)](#), 'Security Physical and Support Services'.

As an approved and vetted supplier on CCS, Reliance High-Tech is pre-qualified to provide Electronic Security and Lone Worker Protection Services – including design, installation, maintenance and monitoring to any public sector entity wishing to use this framework.

The new framework provides a simple route for public sector organisations to access security services and has been designed to provide value for money, trust and experience. Organisations that can access services under the new framework include police, local government, health, education, housing associations and charities.

Already a market-leading integrator within Government, MoD, Critical National Infrastructure and public sector and commercial enterprises, Reliance High-Tech also recognises the critical importance of ensuring any security solution is built with consideration to cyber security, information security and business continuity as standard.

As such, to give public sector organisations peace of mind, Reliance High-Tech also holds the highest [accreditations](#) in the industry, including:

Cyber Essentials Plus – Cyber Security

ISO27001 – Information Security and Cyber

ISO22301- Business Continuity

Considered the gold standard for public sector procurement, with over £2.8bn of work placed in between 2011 and 2022, Crown Commercial Services can be found by clicking on the link [here](#).

A spokesperson said: “Reliance looks forward to supporting valued public sector partners and protecting their people, their assets and their reputations.”
