

SPIE completes MEP services contract for Sacred Heart Primary School with Morrison Construction Ltd

3 years ago

SPIE UK has recently completed a contract with Morrison Construction Ltd. to deliver full mechanical, electrical and plumbing (MEP) works to Sacred Heart Primary School for hub South West on behalf of South Ayrshire Council.

As part of the contract, SPIE UK were responsible for delivering full MEP package to Sacred Heart Primary School. The package included state of the art renewable energy heating and ventilation, photovoltaics solar system, LED lighting, sprinkler system and full fire & security package to protect the building and its occupants.

Built over two storeys, the seven-classroom building can accommodate up to 125 students. The semi open-plan design includes interactive learning areas, a nurture room, a general-purpose room, and a multi-use dining and hall. Renewable energy sources are also installed as part of the project which tap into SPIE UK's ongoing commitment to driving the implementation of sustainable technologies in the built environment.

Stuart Craig, Senior Project Manager, at SPIE UK, said "As we have a longstanding working relationship with Morrison Construction Ltd, it is our pleasure once more to utilise our collective MEP skills to ensure and deliver a functional and efficient infrastructure for Sacred Heart Primary School. Having successfully completed service level agreement projects at Killearn Primary School, Dunoon Primary School & Dregghorn Barracks in the past 3 years, we enjoyed delivering on this project within the six-month timeline."

Paul Dobie, Project Director at Morrison Construction Ltd, added, “Today’s rapidly transforming learning environment and tools demand flexibility and ease of maintenance, but we knew that the SPIE UK team was well equipped to help us tackle them. With this in mind, we were confident that SPIE would deliver against our expectations.”
