

GSH Revenue in UK Grows by 35% in 2022

3 years ago

Several new contract wins and the amalgamation of Team Q Maintenance into the GSH Group has led to GSH's UK revenue increasing by 35% in 2022.

Expanding its self-delivery capabilities and focusing on intelligent maintenance solutions to exceed customer expectations has created significant growth and expansion into new sectors and locations in the UK.

From December 2022, GSH will operate as a single entity in the UK – GSH Facilities Management Ltd – led by UK MD Guy Busfield and Commercial Director Mark Pawson. They will be supported by existing Team Q and GSH personnel, in addition to Group resource and support functions including cutting-edge sustainability and energy management services to expand the breadth of FM services at the highest service levels.
