

PTSG performs tests on animal health centre

3 years ago

[Premier Technical Services Group Ltd](#) has completed a specialist electrical services project for a leading multinational animal health company.

Boehringer Ingelheim Animal Health (BIAH) was formed in January 2017 when Merial was acquired by Boehringer Ingelheim and merged with Boehringer Ingelheim's existing animal health assets.

The company's philosophy is that when animals are healthy, humans are healthier too. BIAH provides advanced, preventive animal healthcare – its vaccines, parasiticides and pharmaceuticals protect animals against disease and pain and its specialists develop new and advanced therapies to help manage chronic diseases more effectively, limiting pain and slowing disease progression.

Engineers from [PTSG Electrical Services Ltd](#) have completed a test and inspection of the lightning protection system in place at the company's UK site in Pirbright, Surrey. Such tests are required by law to ensure they can remain fully operational to protect buildings and their users.

PTSG is the UK's leading provider of lightning protection services, designing and installing bespoke lightning and surge protection systems for clients in all sectors, as well as carrying out testing and inspections, repairs, maintenance and upgrades.
