

Global pharmaceutical company renews cleaning contract with MagicCote for fourth year

2 years ago

MagicCote is pleased to announce that its contract with market leader Indivior has been renewed for a fourth consecutive year, engaging the commercial cleaning specialist to deliver essential cleaning services at its state-of-the-art production facility in Hull.

MagicCote technicians will once again undertake contract, high-level and window cleaning at the fine chemical plant, which manufactures the active pharmaceutical ingredients used in Indivior's pioneering addiction treatments.

A global pharmaceutical company, Indivior specialises in treatments for substance use disorders and other mental illnesses. Maintaining high levels of cleanliness at its production facility is critical, and it has partnered with Hull-based MagicCote for the last four years.

MagicCote's team will use the latest equipment to clean high-level areas and windows, as well as providing additional cleaning support onsite.

Indivior is one of a string of market-leading companies (including facilities management specialist Sodexo and Howden's Joinery) to renew its contract with MagicCote for the new year.

MagicCote's director, Adam Carrison, commented: "We're delighted that Indivior has placed its trust in MagicCote for another year, and look forward to continuing our partnership."
