

Mitie appointed to NHS London Procurement Partnership Total Facilities Management Framework

3 years ago

Mitie has been named as a supplier on NHS London Procurement Partnership's Total Facilities Management Framework.

The new agreement will enable Mitie to bid for contracts which support all authorities through the provision of facilities management. This includes six lots, covering hard, soft and total facilities management, cleaning, catering and security services.

This appointment provides Mitie with the opportunity to pursue facilities management contracts within healthcare sites and public buildings, ensuring facilities management services are co-ordinated effectively to deliver a holistic approach for health and public sector organisations.

Over the next four years, the framework enables Mitie to bid for procurement contracts in Greater London, North East, North West, Midlands, East, South East and South West regions. This framework plays to Mitie's expertise in providing a wide range of services and reinforces its position as a key government supplier supporting the NHS.

Alice Woodwark, Managing Director, Communities, Mitie, said: "We are delighted to continue supporting the NHS with this new framework appointment. Bringing our technology-led approach, we will continue to ensure that our brilliant frontline colleagues can keep delivering an exceptional service for the NHS and the public sector."
