

New member joins global partner network

3 years ago

IFS, the global enterprise applications company, has announced that Peacock Engineering, a specialist in enterprise asset management (EAM), FM and field service management (FSM) solutions, has joined the IFS Global Partner Network.

The company is headquartered in the UK with offices in London, Bristol and Leeds, with additional facilities in India.

As a new Gold Partner, Peacock Engineering's domain experience and proven track record in delivery as a reseller and implementor of EAM and field service solutions is intended to solidify and forge new market opportunities in IFS's EAM business unit.

IFS's leading EAM solution is a flexible, composable, cloud-native solution with specific industry focus and capabilities designed to handle the complex asset demands of its customers.

IFS is positioned as number one in the Gartner EAM market share analysis based on revenue. Further to this, IFS also acquired Ultimo Software Solutions, the Netherlands-based provider of cloud EAM software.

Commenting on the announcement, IFS Asset Management Business general manager Nils van der Zijl said: "Peacock Engineering's skills in the Enterprise Asset Management domain are some of the best in the industry. We are assured that through its teams expertise our new partnership will strengthen the IFS Partner ecosystem and deliver value to our customers."

"Collectively, its team of experts has hundreds of years of experience, and we look forward to Peacock Engineering applying that skill and experience to IFS Cloud to deliver Intelligent Asset Management and complex Planning, Scheduling and Optimisation. Welcome to the IFS Ecosystem Peacock Engineering."

Peacock Engineering chief executive officer Alan Cambridge said: “We are very excited to be joining IFS as a Gold Partner. I am proud that we have successfully established Peacock Engineering as a well-respected provider and consultant of leading Enterprise Asset Management software.

“Our new partnership with IFS builds upon our success as a growing business and a leader in providing bespoke digital solutions in the EAM, FM and FSM sectors. We look forward to maximising our customers’ success with IFS and contributing to their growing partner ecosystem.”
