

PTSG completes electrical services for Bentley Motors

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has completed a specialist electrical services project at Bentley Crewe.

Also named the Pym's Lane site after the street it is located on, Bentley Crewe is the headquarters and design and manufacturing centre of Bentley Motors Limited on the outskirts of Crewe in Cheshire. The site covers an area of 521,111 m² (5,609,190 square feet), of which 166,930 m² (1,796,800 square feet) is indoors.

Bentley and Rolls-Royce are probably Britain's best known luxury car producers. They are strikingly different yet similar – a result of their history, which became permanently intertwined in the early 1930s when Bentley was acquired by Rolls-Royce. With the end of production of Rolls-Royce badged cars in 2002, the factory in Crewe was redeveloped to allow an expansion of the Bentley brand through a series of new models.

Engineers from [PTSG Electrical Services Ltd](#) have completed a test and inspection of the lightning protection system in place at Bentley Crewe. Such tests are required by law to ensure they can remain fully operational to protect buildings and their users.

PTSG is the UK's leading provider of lightning protection services, designing and installing bespoke lightning and surge protection systems for clients in all sectors, as well as carrying out testing and inspections, repairs, maintenance and upgrades.
