

PTSG steels itself for new contract at Tata

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has secured a contract to deliver specialist electrical services at Tata Steel in Wolverhampton.

Tata Steel is one of the largest steel producers in Europe. Steelpark is the company's base in Wednesfield on the outskirts of Wolverhampton, West Midlands. It specialises in distribution and processing. In fact, it is the UK's largest steel distribution and processing centre, and the only one to be supported by a domestic steel mill.

With a complete multi-metal and full-finish capability, including decoiling, slitting, blanking, press blanking and tailor welded blanks, our hi-tech service centre provides dedicated processing and services for OEMs and tier suppliers.

Engineers from [PTSG Electrical Services Ltd](#) will complete a test and inspection of the lightning protection system in place at the facility in Wolverhampton. This is required on an annual basis to determine whether it continues to be operationally efficient. If the system requires any repairs, PTSG's engineers are fully trained to do the work required to ensure it meets BS EN 62305.

PTSG is relied upon to design, install, test, inspect and maintain lightning and surge protection systems at buildings and structures of all kinds throughout the UK in sectors as diverse as healthcare, education, retail, aviation and defence, public sector and government and industry.
