

Artic wins hard FM Contract for International University in London

3 years ago

[Artic](#) is thrilled to have won the contract for [Hard FM](#) Mechanical & Electrical maintenance services at a prestigious international University in Central London.

Its team of skilled engineers will now provide maintenance and support to ensure the smooth operation, safety, and efficiency of the campus.

A spokesperson said: “We understand the significance of maintaining the comfort and safety of all building users, and as such, we have implemented state-of-the-art equipment and a [24/7 help desk](#) facility to meet their needs. Our maintenance processes will cover all aspects of Mechanical, Electrical, and Air Conditioning systems, and we will perform regular scheduled maintenance visits and frequent performance reviews to ensure that all assets are functioning optimally.

“In addition to our scheduled maintenance visits, [our engineers](#) will be on-site on a weekly basis to address any unexpected issues and to ensure the efficient operation of all systems. This not only provides peace of mind for the client, but it also allows us to respond quickly to any issues that may arise and prevent them from becoming bigger problems in the future.

“We are committed to providing exceptional maintenance services and take pride in working with such a major institution.”

Artic’s goal is to ensure that the building remains a top destination for its students and continues to be a leader in its field.

Artic provides a range of services, including [HVAC](#) maintenance and energy-saving solutions, to ensure safety, compliance, comfort and efficiency for students, staff and visitors. [Contact Artic](#) today for a tailored solution that meets specific needs and delivers the highest level of service and support.
