

PTSG entrusted with specialist services project in South London

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has completed a specialist electrical services project at a National Trust site in South London.

Morden Hall Park is a National Trust park on the banks of the Wandle in Morden. Taking into account its several buildings and associated parking, it spans 51 acres of predominantly parkland. Hinting at the former mill leats the river here splits into channels, generally, through it spanned by numerous footbridges.

The estate contains Morden Hall itself, Morden Cottage, two well-preserved snuff watermills, a restored stable yard, a dog-friendly café, exhibition space and second-hand bookshop. A western part, separately accessed, hosts the National Trust's only Garden Centre.

Engineers from [PTSG Electrical Services Ltd](#) have performed a test and inspection of the lightning protection system in place at Morden Hall Park. This is required on an annual basis to ensure compliance with British standards. Any maintenance or repair work that is necessary as a result of the test and inspection can also be undertaken by PTSG's electrical services engineers.
