

PTSG stationed at RAF Lossiemouth

3 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) is on site at RAF Lossiemouth, a military airfield located on the western edge of the town of Lossiemouth in Moray, north-east Scotland.

Lossiemouth is one of the largest and busiest fast-jet stations in the Royal Air Force (RAF) and known for its close proximity to flight training areas in Scotland and its favourable local flying conditions.

Since the closure of RAF Leuchars in 2015, Lossiemouth is the only operational RAF station in Scotland and is one of two main operating bases for the Eurofighter Typhoon FGR4 in the United Kingdom. It is home to four front-line fast jet units which operate the Typhoon: No. 1 Squadron, No. 2 Squadron, No. 6 Squadron and No. 9 Squadron.

Engineers from [PTSG Access & Safety Ltd](#) are fitting a step unit to allow access to the high-level roof of the Atlantic Building at the base. PTSG deliver a full range of fall protection equipment for clients in all sectors, as well as carrying out periodic testing and inspection, maintenance, repairs and upgrades – plus training.
