

Vertas Group launches its HSQE Strategy

2 years ago

Vertas Group is delighted to announce the launch of its new Health, Safety and Wellbeing strategy 'Making the Difference Safely' for 2022 to 2025. The strategy has been developed to support the company's key values, strategic business planning and People Strategy.

'Making the Difference Safely' has been devised to motivate colleagues to improve the efficiency and effectiveness of the Group's SAFE Management System. The strategy introduces the SAFE Objectives which will deliver a safer and more sustainable workplace, and build a culture of excellence throughout the Group.

The SAFE objectives driven by the Group objectives and our corporate values:

- Simplicity – to continually improve the Group's award-winning Integrated Management System to ensure it remains relevant, simple, easy to use, and fit for purpose.
- Accountability – communicate roles and responsibilities at all levels, to ensure colleagues understand they must work safely and sustainably at all times, and ensure client satisfaction.
- Family – consistently reduce the risks to the Vertas Family so they can be safe, be sure, be healthy, and return home safely to their loved ones every day.
- Excellence – Inspire a culture of excellence and continuous improvement throughout the Group.

The strategy provides the key focus points for health, safety, and wellbeing over the next three years. The full strategy can be found on Vertas Group's website [here](#).

Kelly Fellowes, Associate Director HSQE C&G, comments: "The health, safety and wellbeing of our colleagues influences every decision we make. We were proud to have won the Royal Society for the Prevention Accidents (ROSPA) Facilities Management Sector award in 2022. This prestigious award demonstrates that Vertas Group has consistently high standards and are continually improving, and that

we have the best health and safety management performance within the Facilities Management Sector. This strategy shows our commitment to continual improvement and puts health and safety at the forefront of our thinking."
