

Adler and Allan confirms FDIS contract

3 years ago

Environmental, energy and infrastructure maintenance services organisation, Adler and Allan, has confirmed that it has agreed a contract with Vinci Facilities to deliver services as part of the Defence Infrastructure Organisation's (DIO) Future Defence Infrastructure (FDIS) contract in the South East.

The contract will see Adler and Allan deliver planned preventative maintenance works across MOD fuel infrastructure, including mechanical and electrical PPM across bulk fuel storage and pipework. The work will also include ammunition storage areas and CompEx testing.

The work is underpinned by sustainable procurement which ensures all the company's projects are undertaken in the most environmentally efficient way possible to adheres to its supplier commitments.

Fuel Infrastructure director Charles Price said: "We look forward to a successful working relationship with Vinci Facilities over the coming years. Adler and Allan is committed to ensuring day-to-day delivery of great customer service and performance across the remit of our work at the 58 MOD sites under VINCI Facilities FDIS Built Estate Contract in the South East."

"Our experience working with MOD facilities across the design, build, installation and ongoing maintenance of fuel infrastructure and our continued account management and sustainability credentials, positions Adler and Allan as a key supply chain partner for FDIS primes."
