

ISS India unveils new headquarters and Facility Management Experience Center running 100% on renewable energy

2 years ago

ISS Facility Services India has relocated its headquarters to a new, state-of-the-art office building in Mumbai. This 100% green office runs on renewable energy sources and incorporates sustainability practices that result in zero emissions. In addition, ISS India has announced a new education policy for its frontline employees.

ISS Facility Services India has relocated its headquarters to a new, state-of-the-art office building in Mumbai. This 100% green office runs on renewable energy sources and incorporates sustainability practices that result in zero emissions.

In addition, the office boasts a state-of-the-art Facility Management Experience Center that sets a new standard for the industry. The center showcases its technology capability with a demonstration of its various features and functionalities.

ISS India also announced a new education policy 'ISS Education for All' for its frontline employees. The policy provides an opportunity for these employees to complete their formal education and advance their careers. Many of ISS's frontline placemakers have limited formal education and this policy will help them to achieve their full potential.

"India is a strategic market for ISS Group and a major player in the Asia Pacific region with immense growth potential. We are committed to making a meaningful impact in India by focusing on innovation, sustainability, and skilling, which are critical to achieving our environmental, social, and governance (ESG)

goals. Our growth strategy and new milestones in India are centered around these key areas, and we are excited about the opportunities for growth and impact in the region. I am delighted with the rollout of 'ISS Education for All'. This initiative has a transformative ability, and is part of our global commitment to provide more than 100,000 of our employees or their family members a recognised qualification by the end of 2025," said Jacob Aarup-Andersen, Group CEO of ISS.

Elaborating on the announcement, Aksh Rohatgi, CEO and Country Manager, ISS India said: "With more than 50 technological innovations, our new office is the first of its kind workplace: a completely new experience for the Indian workforce. Our new education policy is another significant step toward our nation-building efforts. We look forward to many more initiatives in the future."

ISS India's new office space is a testament to the company's commitment to reducing its carbon footprint and creating a more sustainable future. The new office building is designed to meet the highest energy efficiency standards and features a range of cutting-edge technologies and systems that minimize its environmental impact. This includes the use of technical data monitoring (TDM), Winnow – AI enabled food waste management tool, and other applications such as Smart Energy & water flow metering, IAQ, etc. to ensure employee wellbeing.
